

## Charlie's Story

*Charlie, is 9 years old. He's a Pit Bull Pointer mix. Over the past few years he developed a mild case of hip dysplasia, which would make him limp when he walked and he would have to steady himself to sit. He also had inflammation on the inside of his ears that we could never get under control. We started giving him the 9.5 pH water to drink and used the 2.5 pH water for his ears. He started showing signs of improvement after only a few days. Now, his hip is no longer a problem. He is bounding around like a puppy again and sitting takes him no effort at all. His ears look great! He's in better shape now than he's been in years. Charlie loves his Kangen water!*

Are you and your pets drinking enough water?  
Is it coming from the tap?

### Drug Traces Common in Tap Water

ASSOCIATED PRESS - Published: March 10, 2008  
A vast array of pharmaceutical drugs -- including antibiotics, have been found in the drinking of over 41 million American households.

### Proper Hydration is the key....

If a plant dries out, the leaves crack and the branches become brittle, if it doesn't get water, it will die. Give it some water and it may spring back to life. Make sure you and your pet stay hydrated and healthy. Try the Kangen 9.5 pH, it might be a very simple solution to improving the health and happiness of your entire family.

*Now you can make the healthiest water in the world for your family and your pets, right at home, instantly, anytime you want.*

Pure Kangen Water:

# Pets Love It! Vets Love it!

*Thanks to Enagic and the Leveluk SD501, more and more families are discovering that by simply changing the water they drink, they can change the way they feel. And when we say family, we mean family!*

*Now you can turn your ordinary tap water into healthy, high antioxidant drinking water for you and your pets.*

## • Dogs...

### *They either like it or they don't!*

We all know what it's like to bring home a new toy or dog food that "we like" only to have our furry friend take one look, one sniff, then turn their nose up and walk away.

Try this... For a couple of days take 2 identical bowls, fill one with the water you've been using, fill the other with Kangen 9.5 pH, then see what happens.

A lot of dogs will take one sniff then immediately start drinking the Kangen water, most will love it and it will quickly become their water of choice.

Owners have noticed shinier coats and sweeter breath. Many older dogs with joint and mobility problems have more pep in their step and appear to have less pain after just a few days of drinking the 9.5 pH Kangen water.

There's no placebo effect here— unlike humans, dogs don't know what they should feel. They either get a benefit or they don't. Let your dog be the judge. Imagine how great it would be if something as

simple as changing their water could truly change their life, and yours.

## Coco's Check-up

*Our Cocker Spaniel Coco is thriving!! This 9.5 pH Kangen water has detoxified Coco's system and is helping her fight a debilitating leg problem. Every three weeks I bring her in to have her anal glands drained... now that she is drinking Kangen 9.5 pH we waited 6 weeks and when I brought Coco in for her draining the glands were empty, the vet tech was amazed.*

*- Patty*

*P.S. Coco loves her Kangen water so much you can hear her slurping it up in the house!!!!*
